**Re: Invitation to present a conference talk as invited speaker**

Dear Professor Wiwatanapataphee,

The School of Mathematical Sciences and Geoinformatics at Suranaree University of Technology will be hosting the conference *Advances in Applications of Analytical Methods in Solving Differential Equations (Symmetry 2024)* during 22-25 January 2024. This conference is organized jointly with the Department of Mathematical Sciences at Stellenbosch University in South Africa, the Lavrent'ev Institute of Hydrodynamics of the Russian Academy of Sciences and the Moscow Center for Fundamental and Applied Mathematics. Because of travel difficulties for some of the participants, this conference will be in hybrid form; some participants will attend in person at Suranaree University of Technology, while others will join online through Zoom video conferencing. The main topic of the conference is exact solutions of ordinary and partial differential equations, yet there is also a strong focus on mathematical modelling and applications to the sciences and engineering.

As you have substantial research experience in the latter areas, the academic organizing committee wishes to invite you to participate in the conference and present a 30-minute invited talk on a topic of your choice. You may attend either on-site or by video conference, as you see fit.

As invited speaker, you will be waived the registration fee, and should you choose to participate onsite, the conference will defray hotel accommodation and local transportation, and provide for meals. You may consult the conference website <https://symmetry2024.sut.ac.th> for further conference details.

We are looking forward to receiving your response. Should you accept this invitation, please inform us in your reply about the title of your talk, and forward a one-page abstract of your talk by e-mail within December 31 of this year.

Yours Sincerely,

Sergey Meleshko  
Chair, Academic Committee
